

How Is Your Dog Progressing With Librela?

Knowing your dog's osteoarthritis (OA) pain is under control can be a huge relief for you and them. To make your next appointment as productive as possible, here are some things you can do to prepare.

In between monthly appointments, be sure to pay attention to both the physical and emotional behaviors of your dog.

Has your dog's playing, jumping, or stair climbing improved?
Do they seem to be feeling better?

Track your dog's progress by taking notes or videos.

You can share this information at your next visit. Your dog should show improvement over time. If not, make sure to contact your veterinarian to discuss.

We can't wait to talk about your dog's progress with Librela! Make sure you're scheduling an appointment every month to keep your dog on track with their treatment.

IMPORTANT SAFETY INFORMATION: For use in dogs only. Women who are pregnant, trying to conceive or breastfeeding should take extreme care to avoid self-injection. Hypersensitivity reactions, including anaphylaxis, could potentially occur with self-injection. LIBRELA should not be used in breeding, pregnant or lactating dogs. LIBRELA should not be administered to dogs with known hypersensitivity to bedinvetmab. The most common adverse events reported in a clinical study were urinary tract infections, bacterial skin infections and dermatitis. See full Prescribing Information at [LibrelaPI.com](https://www.librela.com).
